Biodiesel is a fantastic solution for fleets who want to slash tailpipe emissions from their diesel-powered vehicles without replacing them. In fact, biodiesel boasts a 74% reduction in lifecycle carbon dioxide emissions relative to petroleum diesel, and up to 70% lower emissions of local air pollutants like particulate matter (PM2.5) and nitrogen oxides (NOx). Learn more here! afdc.energy.gov/vehicles/diesels_emissions.html [#Biofuel](#) [#Biodiesel](#) [#CleanAir](#) [#CleanCities](#) [#SoyInTheCity](#)

Did you know that NYC's municipal fleet vehicles use more biodiesel than any other city in the U.S.? Thanks to the leadership of NYC DCAS, NYC's municipal fleet agencies have been using biodiesel for fleet trucks for years to greatly reduce emissions as the City moves to all zero-emissions solutions in the 2030s. To learn more about how the City uses biofuels, check out NYC DCAS's website!

BIODIESEL BASICS

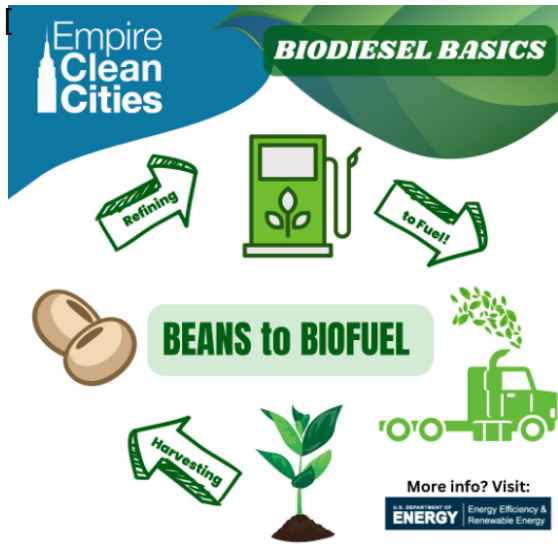

Did you know that New York City's fleets use more biodiesel than any other municipal fleet in the country—and they've been using it to reduce emissions for more than two decades?

BIODIESEL BASICS

NYC's Department of Citywide Administrative Services (DCAS) is one of the nation's leading adopters of biofuels, and agencies including DSNY, NYPD, FDNY, and DOC use biofuels for fleet trucks.
